Riyaz0122

Summary

Computer Science undergraduate with strong foundations in Data Structures and Algorithms, passionate about problem solving and building scalable AI-driven systems. Experienced in developing machine learning using Python, with a focus on optimizing performance through efficient algorithms and data-driven design.

Education

Vignan's Foundation for Science, Technology & Research
B.Tech in Computer Science and Engineering (CGPA: 7.5/10.0)

September 2023 – April 2027

Board of Intermediate Education Andhra Pradesh
Class 12th MPC — 71%

March 2021 – May 2023

Board of Secondary Education Andhra Pradesh
Class 10th — 100%

March 2020 – June 2021

Technical Skills

- **Languages:** C, Python
- **Web Technologies:** HTML, CSS, JavaScript, React.js, Node.js, express.js
- **Core Concepts:** Data Structures, Algorithms, Object-Oriented Programming (OOP), Machine Learning, Deep Learning
- **CS Fundamentals:** Computer Networks, Operating Systems, Database Management

Projects

Fitness Tracker

- Built a fitness tracking application to record daily activities such as steps, calories burned, and workout duration.
- Improved user engagement by adding progress tracking and goal-setting features.
- Managed data storage to ensure efficient retrieval and analysis of user activity records.

Multi-Disease Prediction System using Deep Learning

- Built a deep learning model to predict multiple diseases using patient data.
- Applied data preprocessing, feature scaling, and model tuning to improve accuracy.
- Generated predictions to support early detection of health conditions.

Typing Speed Test Website (MERN Stack)

- Created a full-stack typing speed test application using MongoDB, Express.js, React, and Node.js
- Calculated typing speed and accuracy in real time with instant feedback
- Stored user results in a database to track performance over time

Loan Prediction System using Machine Learning

- Developed a machine learning model to predict loan approval status based on applicant data
- Performed data preprocessing including handling missing values, encoding categorical features, and feature scaling
- Trained and evaluated classification models to improve prediction accuracy

Certifications

- **Cisco Networking Academy:** Cybersecurity, Data Science Certification
- **Vignan ubiversity:** MERN Stack Development
- **NPTEL:** E-Business and Public Speaking

Awards & Recognitions

- **Algorithmic Problem Solving:** Solved 250+ complex Data Structures and Algorithms challenges on CodeChef, optimizing solutions for strict time ($O(N)$) and space complexities.
- **Competitive Programming:** Attained a top 10% global ranking across multiple coding competitions by rapidly prototyping and debugging robust algorithms under time constraints.
- **Academic Achievement:** Achieved a B+ grade in the rigorous PET examination.

Leadership & Responsibilities

- **Technical Event Coordinator — Coding Club:** Organized and coordinated technical events for the university coding club, driving a significant increase in peer engagement and programming activities.
- **Peer Mentor:** Mentored junior students in core Computer Science fundamentals, facilitating interactive coding sessions and promoting collaborative software engineering practices.
